

ENERGY STORAGE SOLUTIONS

Empowering Projects with Smart Energy Solutions

Optimized, Secure, and Customized for Electrical Infrastructure Needs

Energying the World with Intelligent Sustainable Solutions

OUR SOLUTION

We provide flexible and customizable energy management systems that integrate and optimize energy flow between various sources:

- **Multiple Battery Chemistry:** Offering tailored solutions based on site requirements.
- **Energy Optimization:** Efficient management of energy between:
 - EV Charger
 - Solar Power
 - Battery Storage
 - Wind Power
 - Grid Systems

Our solution ensures seamless and cost-efficient energy management for projects of any scale.

WHO WE ARE & INTEGRATION CAPABILITIES

We are a specialized team of General Contractors and a trusted Consultant Group delivering innovative energy solutions tailored for the Customer RFP.

Our Energy Management System (EMS):

- Integrates seamlessly with existing **Building Management Systems (BMS)**.
- Adapts to the specific needs of **over 2,000+ locations**, ensuring site-specific customization.
- Meets strict **cybersecurity requirements**.
- Is proudly **Made in North America**, supporting local innovation and compliance.

KEY FEATURES

- 1. Made in North America:** Supporting local manufacturing and federal compliance.
- 2. Safety:** No fire hazard.
- 3. Cybersecurity Compliance:** Meeting federal standards for secure systems.
- 4. Customizable Solutions:** Tailored to site-specific operational needs.

WHY CHOOSE US?

Our integrated approach provides:

- Reduced Operational Costs
- Enhanced Energy Efficiency
- Seamless System Integration
